

The Open University of Sri Lanka

B.Sc/B.Ed. DEGREE, CONTINUING EDUCATION PROGRAMME

No Book Test - 2019/2020

Level 05 - Applied Mathematics

ADU5305/ ADE5305 Statistical Inference

Duration: - One Hour.

DATE: - 15-08-2020

Time: - 9.00 a.m. to 10.00 a.m.

Non programmable calculators are permitted. Statistical tables are provided.

Answer all questions.

1.

(a) Briefly explain the following terms.

(iii) Type I and Type II errors

(v) Critical region

(b) Assignment marks and final examination marks of a subject for randomly selected 15 students are given below.

Student Name	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
Assignment mark	60	47	60	56	47	27	45	61	68	62	35	53	57	25	31
Final Mark	67	54	53	49	47	35	30	77	57	54	42	60	63	42	28

Using suitable statistical test, test the validity of the claim that "Expected assignment mark is greater than the expected final examination mark for a randomly selected student". Use 5% level of significance.

2.

According to past experience a company that produces a certain electrical bulb claims that the life time X (in years) has a normal distribution with unknown mean and variance. A sample drawn from the above distribution is given below.

8.16 11.50 7.28 10.07 12.90 11.01 11.11 8.27 11.65 9.68 11.46 6.26 10.39
8.05 10.48 14.62 8.96 10.72 10.37 11.71

- (i) Find 95% confidence interval for mean lifetime of a randomly selected bulb. Interpret your results.
- (ii) Find 90% confidence interval for variance lifetime of a randomly selected bulb. Interpret your results.

Chi-square Distribution Table
